

AERLINE H 949

SWB (Swedish Warm Blood)
Born 1993

Number one
in the Stallion Selection 1998
BLUP index 144 in show jumping
113 in dressage.

Aerline H has an excellent pedigree.

He represents an exceptional combination of European bloodlines, with a very high number of international competition horses, both in show jumping and in dressage.

Aerline H is himself an eminent specimen.

In the stallion selection he was approved with 42 points for exterior and movements. Total points during tests were 20.4, among the highest score ever given, with high points both in jumping and in dressage, and with the highest grade in 'riding abilities' (cooperation during riding, willingness, temper, spirit).

He qualified for the final in Breeders Trophy-dressage, and has after that competed successfully up to international grade S in Showjumping. (1.50 - 1.60)

Aerline H has already been successful in breeding.

He is now one of the top Swedish Warmblood stallions, with successful offsprings in all young horse champion competitions in Sweden. In the BLUP index statistics he has passed his legendary father Cortez, and is now ranked number two among show jumping stallions alive in Sweden.

It is evident how he transfers not only jumping capacity and movements, but also exterior, temper and riding ability.

Semin from Aerline H has a high quality, also frozen. Percentage of pregnancy has been over 90% the last years.
